

Public Health—Seattle & King County

Get a free flu shot and help us prepare.

Saturday, December 2, 2006
10:00 a.m. to 2:00 p.m.
Garfield Community Center
2323 East Cherry Street
Seattle, WA 98122

1. Practice

Public Health is practicing our ability to give vaccinations to a large number of people in a short amount of time. So if we ever need to respond quickly, we'll be ready.

2. Prepare

By volunteering to be part of our event, you're helping Public Health prepare to quickly provide vaccines that can reduce the rapid spread of illnesses in an emergency. Fortunately, **there is no emergency at this time.**

3. *Stay Healthy*

At this event, you and your family will get a free vaccination that helps protect against common flu germs. This will give you a much better chance of staying healthy this winter.

Flu shots are recommended each year especially for:

- children 6 – 23 months of age
- people 65 years or older
- other people who have chronic diseases, and their caregivers
- pregnant women

Doors open at 10:00 a.m. and close no later than 2:00 p.m., or as soon as 1,000 people receive a flu vaccination.

Questions? Call (206) 296-4672; TTY Relay: 711
